### **Notes**

Bluejay is listed on the London AIM market and Frankfurt Stock Exchange and its shares also trade on the OTCQB Market in the US. With projects in Greenland and Finland, its most advanced project is the Dundas Ilmenite Project in Greenland, which is being developed towards production in the near term.

The Company's strategy is focused on securing financing ahead of commencing commercial production at Dundas in order to create a company capable of self-funding exploration on its current projects and future acquisitions.

Bluejay holds three additional projects in Greenland - the 2,897sq km Disko-Nuussuaq Magmatic Massive Sulphide nickel-copper-cobalt-platinum group element-gold project, which has shown its potential to host mineralisation similar to the world's largest nickel-copper mining district at Noril'sk-Talnakh,

northern Russia; the 692sq km Kangerluarsuk zinc-lead- silver project, and the 2,555 sq km Thunderstone project which has the potential to host large-scale base metal and gold deposits. In Finland, Bluejay has agreed a joint-venture agreement with Rio Tinto Mining and Exploration Ltd at its Enonkoski Project.
